Can Climate Change Affect Our Health?

It's important to understand how extensive environmental damage is; the **1** _____ our planet becomes polluted, the greater the effect on climate change. The outcome is that our health is more at risk now **2** _____ ever before. A result of climate change has been extreme weather conditions. High temperatures can be as dangerous **3** _____ low ones. Humans will suffer during extended periods of heat but insects will thrive. This is at the expense **4** _____ our health because they carry life-threatening diseases. High temperatures also lead to wildfires which are

becoming more **5** _____ more frequent nowadays. Furthermore, respiratory problems have increased because of poorer air quality, which causes allergies and asthma. Aside **6** _____ extreme heat, other extreme weather conditions can also be hazardous. For example, one of the many consequences of heavy rainfall is the serious effect it has on water quality. Perhaps the **7** _____ terrifying aspect is that these effects will probably get **8** _____ worse.
