

# The Tower of London

## Welcome to the Tower of London!

**T**he Tower of London is a historic palace near the River Thames and Tower Bridge. It was built by a Frenchman, William the Conqueror, the Duke of Normandy who invaded England in 1066.

First, it was a fortress to protect London. Next, it became a palace, then a prison, and

finally a museum where you can admire the unique collection of the crown jewels!

Ravens are very important at the Tower because a legend says that the monarchy will disappear if those black birds leave the Tower.

Beefeaters guard the Tower and are pleased to help you and answer all your questions.
