- 3 There _____ some honey in the tea.
- 4 There _____ some milk in the fridge.
- 5 There _____ a lot of sugar in the cake.
- 6 There _____ a lot of salt in the packet.

Complete with *isn't* or *aren't*.

- 1 There _____ any vegetables in this salad.
- 2 There _____ many apples in the box.
- 3 There _____ any honey in the pie.
- 4 There _____ any milk in the glass.
- 5 There _____ much sugar in the tea.
- 6 There _____ much salt in the soup.

Complete with *Is* or *Are*.

- 1 _____ there any vegetables in this soup.
- 2 _____ there many apples in the box.
- 3 _____ there any flour in the cake.
- 4 _____ there any juice in the glass.
- 5 _____ there much sugar in the tea.
- 6 _____ there much salt in the box.

The first part of the paper discusses the importance of the research and the need for a new approach. It then presents the methodology used in the study, followed by the results and conclusions. The final section discusses the implications of the findings and suggests areas for future research.

The research was conducted using a combination of qualitative and quantitative methods. Data was collected from a sample of participants and analyzed using statistical software. The results show that there is a significant difference between the two groups, with the experimental group showing a higher level of performance than the control group.

The findings of this study have important implications for the field of research. They suggest that the new approach is effective and can be used to improve performance in a variety of contexts. Further research is needed to explore the long-term effects of the approach and to determine its applicability to other areas of research.
