1 Time isn't the same around the world. We live on a [1] with different time [2] . For example, when it's day in Hong Kong, it's night in New York. When there's sun in New Zealand, it's dark in the U.K. Often these places are in a different [3] , too.

2 This is because the [4] makes half a full turn every 12 hours. This means New York sees its new day 12 hours after Hong Kong. There are often different [5] zones in the same country, too, such as in Russia or in the U.S.A. The U.S.A. has got four [6] time zones.

3 For example, when it's 10:30 a.m. for Kara in California, she's in class. She's had breakfast, so she isn't hungry yet. But John in Montana is getting hungry because it's 11:30 a.m. He wants his [7] soon! It's already lunch time for Maria in Texas, where it's 12:30 p.m. And lunch is finished for Manuel, because the time in New York is 1:30 p.m.
