

Why the Sun and Moon live in the sky

Many, many years ago the Sun and the Moon
...../live / together on the Earth. Water/be/ their
best friend and they often...../ come/ to see him. But
Water never/ go/ to see the Sun and the Moon in
their house.

"Why don't you come to see us?" the Sun once /ask/
him.

"I have too many friends", Water...../ answer/,
"they are going to come with me. I'm afraid there will be no
place for them in your house".

"But I'm going to build a new big house", the Sun
...../say/.

And the Sun /build/ a very big house and then
...../ask/ Water to come to him.

Water...../come/with all fish and water animals.

"Can I come in with all my people?" Water...../ask/.

"Yes, come in", the Sun/say/

Very soon Water in the house was knee-deep for the Sun.

Then in minute Water/be/ up to the Sun's head,
and/come/ higher and higher with all the fish and
water animals. At last Water/be/ so high in the house

that the Sun and the Moon/go/ on the roof and
...../sit/ here. But soon Water/come/ up on
to the roof. What could the Sun and the Moon do? Where could
they sit? And they/go/ up to the sky. They
..... /like/ the place and began to live there.
