## Kids' Predictions for Our Future

- 1 We asked fifth-graders at Elon Elementary School in North Carolina to write what they think the future will bring. Read some of their ideas, and then write about what you think will happen! Share your ideas with your classmates, friends and family. You never know; they might come true sooner than you think.

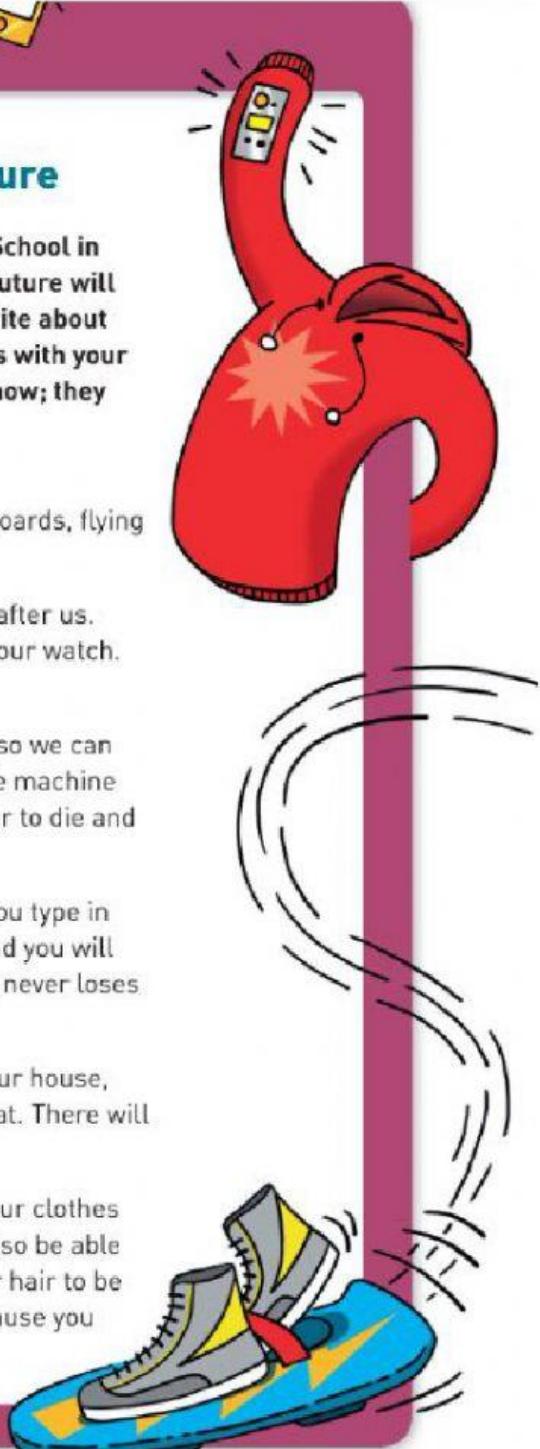

**Amanda F.** – In the future there will be hoverboards, flying cars and pocket-size computers.

- 2 **Sydney Y.** – We will have robots that clean up after us.  
10 The X-box game will be so small it will fit in your watch. Time machines will be amazing.

**Jordan W.** – There will be enough technology so we can communicate with aliens. There will be a time machine to travel through time. There will be the power to die and come back alive.

- 15 **Danielle M.** – There will be a remote<sup>1</sup> where you type in where you want to go then push the button and you will be there. Also we will have chewing gum that never loses its taste.  
20 **Patrick D.** – There will be robots that clean your house, walk the dog, make your bed and stuff like that. There will be computers so small you can't see them.

- 25 **Hannah P.** – We will have mini-computers in our clothes – like on the inside of your sleeves. You will also be able to type into your hairbrush how you want your hair to be styled. Robots can get everything for you because you can tell them to make you something.

### Retrouve les expressions qui signifient

« il y aura... » \_\_\_\_\_

« nous aurons... » \_\_\_\_\_

« nous serons capables de .... » \_\_\_\_\_

## For a better world!

[https://www.youtube.com/watch?v=N53DzL3\\_BHA](https://www.youtube.com/watch?v=N53DzL3_BHA)

- 1) Watch the video up to 1:04' and fill in the blanks:

Forever healthier, happier

With more time for the things that really matter

- 2) Utilise le comparatif pour parler de la vie en 2030, la vie sera plus facile etc.

### 4 Complète ce témoignage :

Life in 2030 will be (fascinating) than today and it will also be (easy). Everybody will live in (modern) flats than they do now. So, everything will be (comfortable). We will certainly have (efficient) appliances, like robots. We will not work (much) as today, so our lives will be (tiring).
