

RECTAS Y ÁNGULOS - TEST

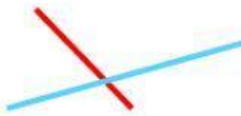

1. ¿Cuántos segmentos forman cada figura?

2. Escribe paralelas o secantes.

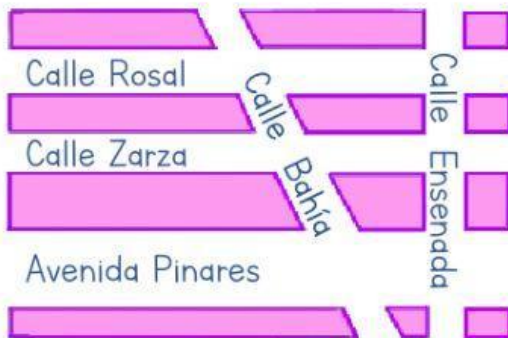

3. Observa el plano y escribe.

- Las calles paralelas a la calle Rosal.

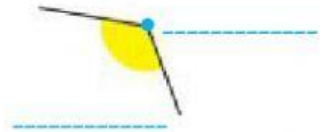

- Las calles secantes a la calle Zarza.

- ¿Cómo son esas calles entre sí?

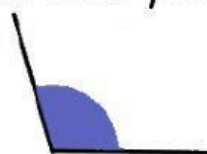

4. Escribe "lado" o "vértice" donde corresponda

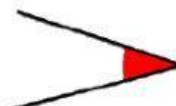

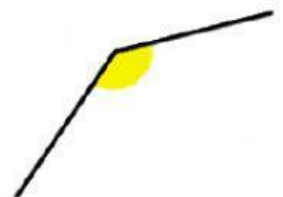

5. Averigua de que tipo son estos ángulos con tu escuadra (o la esquina de un folio) y escríbelo.

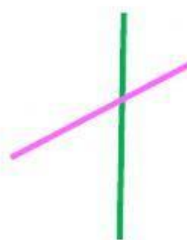

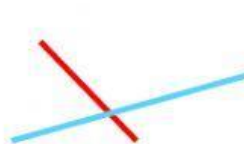

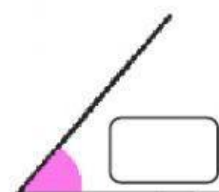

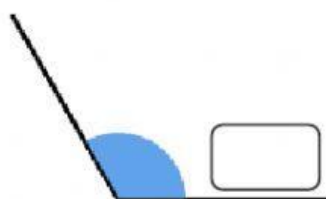

6. Selecciona las rectas que sean perpendiculares.

7. Relaciona los ángulos con su medida. Escribe de qué tipo son.

120° 20° 50°

8. Escribe consecutivos o adyacentes.
