IDEGEN NYELVI MÉRÉS

2019. május 22., 10.00

Általános tudnivalók a feladatokhoz

Ez a füzet idegen nyelvi feladatokat tartalmaz. A feladatsor két részből áll. Az I. részben csak a füzetben kell dolgoznod. A II. részben hangfelvételeket fogsz hallani, és mindegyik után meg kell oldanod egy feladatot a füzetben. Minden feladat egy példával kezdődik, amit szürkével jelöltünk.

Az I. rész végét **Állj!** tábla jelöli. Ha ehhez érkezel, ne lapozz tovább, amíg arra fel nem szólítanak! Amikor a II. részen dolgozol, az I. részhez már ne lapozz vissza akkor sem, ha esetleg nem végeztél minden feladattal a megadott idő alatt!

A feladatok egyik típusa rövid részfeladatokból áll. Mindegyiknél 3 válaszlehetőség (A, B vagy C) közül kell kiválasztanod az egyetlen helyes megoldást.

A feladatok másik típusánál rövid szövegekhez kell szövegeket vagy képeket társítanod. Mindegyikhez csak egyet. Ezeknél a feladatoknál mindig van olyan válaszlehetőség, amit nem kell felhasználnod.

Mindegyik feladat után egy táblázatot találsz. Bárhova írhatsz, miközben gondolkodsz a feladatokon, de végül a megoldásokat ezekbe a táblázatokba kell beírnod úgy, hogy minden cellába egy betű kerüljön. Ha a helyes válaszban nem vagy biztos, akkor az általad legjobbnak gondolt választ írd be!

Figyelmesen olvasd el a feladatok utasításait! Tollal dolgozz, és ügyelj a külalakra! Ha javítani szeretnéd a válaszüzodat, akkor húzd át, és írd mellé a jó választ!

Jó munkát kívánunk!

OLVASOTT SZÖVEG ÉRTÉSE

Task 1

Japan's most famous dog

Read the story. Some words are missing. Choose the correct word (A, B or C) for each gap (1–6). Put your answers in the boxes. There is an example (0) at the beginning.

In front of the well-known Shibuya train station in Tokyo, there is a life-size bronze (0) of a dog. The statue is quite (1), however it isn't difficult to find. It has been used as a meeting point since 1934 and today you will find hundreds of people waiting there for their friends to (2).

Hachiko, an Akita dog, was born in 1923 and brought to Tokyo in 1924. His (3), Professor Eisaburo and he were inseparable friends right from the start. Each day Hachiko accompanied the professor to Shibuya train station when he left for work. (4) the professor came back, he always found the dog patiently waiting for him. The professor died suddenly at work in 1925 and that day he did not arrive at the station as usual.

The connection between Hachiko and the professor was so strong that he continued to wait at the (5) every day. Though some believe that he (6) again and again because of the food he was given by passengers. In 1934, a statue of him was put outside the station. In 1935, Hachiko died at the place he last saw his friend alive.

Task 2

Looking after a hamster

Read the tips about hamsters. Match each text (1-7) with its title (A-K). Use only 7 titles. Write your answers in the boxes. There is an example (0) at the beginning.

- | | |
|---|---|
| 0 | Hamsters only live to be between 2 and 3 years old, which can be very sad. |
| 1 | Hamsters are small animals who can be viewed by other animals as prey. They could be in danger of getting hurt or killed by animal companions, like cats or dogs. |
| 2 | It is an exotic animal and must be seen by a veterinarian (animal doctor) who knows about exotic animals. Not all veterinarians will treat hamsters, so if yours gets sick, it might be hard to find help close by. |
| 3 | To give your hamster the best care, you must learn about his or her species – there are five. The most common are golden hamsters. They like to be on their own. The second most common are dwarf hamsters. They can live together. |
| 4 | Most hamsters like balls, running on hamster wheels and chewing on sticks so your hamster should have these. Wood items not bought from the pet store should be chemical free. |
| 5 | Hamsters are most active at night. This can be strange for kids who want to play with them during the day. It's important to know that their nightly activity may disturb your sleep. |
| 6 | It's easy to feed your hamsters. They are much like humans, they live on a mixed diet of vegetables and meat. As long as you give them fresh each day, they should be a very happy pet. |
| 7 | It's a good idea to get a big, clean hamster cage all set up with bedding, a water bottle, a wheel, chew toys, and other necessities before bringing them home. |

Task 3

A boat with a difference

Read the story. Choose the correct answer (A, B or C). Write your answers in the boxes. There is an example [0] at the beginning.

The *Plastiki* looks similar to many other boats in Sydney harbour. It's 18 metres long, 6 metres wide and it weighs about 20,000 kilogrammes. When you get near to the *Plastiki* you can see there's a big difference. It's made of 12,500 plastic bottles.

One day David Rothschild found some information on a website about all the plastic in the oceans. He couldn't believe what he was reading. Humans throw away almost all plastic bottles they use and plastic rubbish causes about 80 per cent of the pollution in the sea. To inform people of the problem, he started building a boat made of plastic bottles.

He built the boat with recycled plastic. The boat uses wind power and solar energy. The crew can make meals with vegetables from the small garden at the back of the boat. They can get some exercise by using the special exercise bicycle. The energy from the bike provides power for the boat's computers.

Rothschild sailed the *Plastiki* across the Pacific Ocean. On the way, he took his boat through the dangerous 'Great Garbage Patch' where many ships sank. It is a huge area in the Pacific with 3.5 billion kilogrammes of rubbish. You can see every kind of rubbish here, but the worst problem is the plastic. It kills birds and sea life.

The journey wasn't always easy. There were giant ocean waves and winds of over one hundred kilometres per hour. Originally, Rothschild thought the boat could only travel once but it survived so well that he is planning to sail it one day.
