

WORKSHEET 9.2.4**How much can you remember about the System Life Cycle?**

Name _____ Form _____ Date _____

The steps you need to take when doing this project match the main steps in the system life cycle. It is important that these steps are taken in the right order.

Here are the series of steps but they are not in the right order:

Evaluate

Design

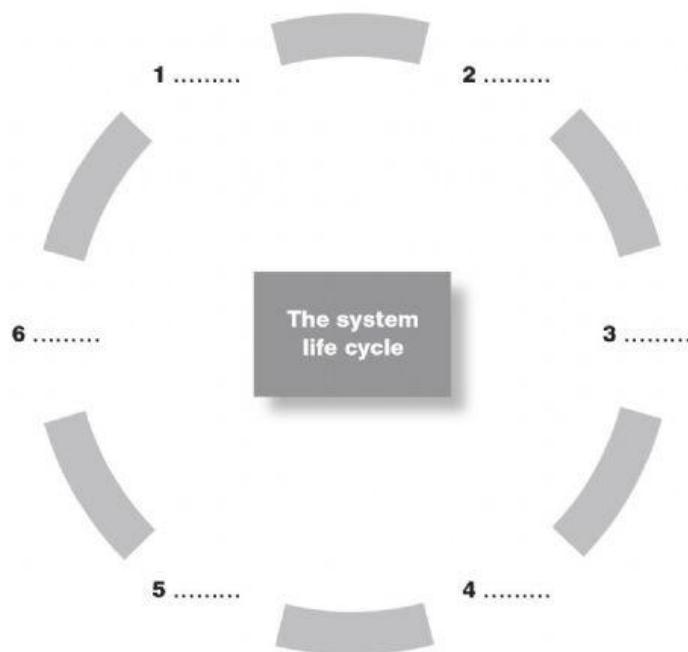

Identify

Test

Implement

Analyse

Put these steps on the diagram in the correct positions.

Here are the descriptions of the activities that make up the system life cycle and the terms used. They are jumbled up, so your task is to join the correct activity with the correct term by drawing a line between them.

Activity

- Make sure the system works correctly
- An outline of the problem
- Create the new system
- Look at the needs of the system
- Refine the system
- Plan the parts of the system

Term

- Identify
- Test
- Evaluate
- Implement
- Analyse
- Design
