

Task 1: Answer the following questions.

What unit do we use to measure angles?	
How can we tell whether an angle is acute?	
How can we tell whether an angle is obtuse?	
What do we use to measure angles?	

Task 2: Practice using the online protractor to measure angles here:

<https://www.mathsisfun.com/geometry/protractor-using.html>

Reasoning: Read the angles shown on the protractor

What is the same?	
What is the different?	
What type of angles are they?
