**Task 1:** Complete the sentences below, by filling in the missing gaps.
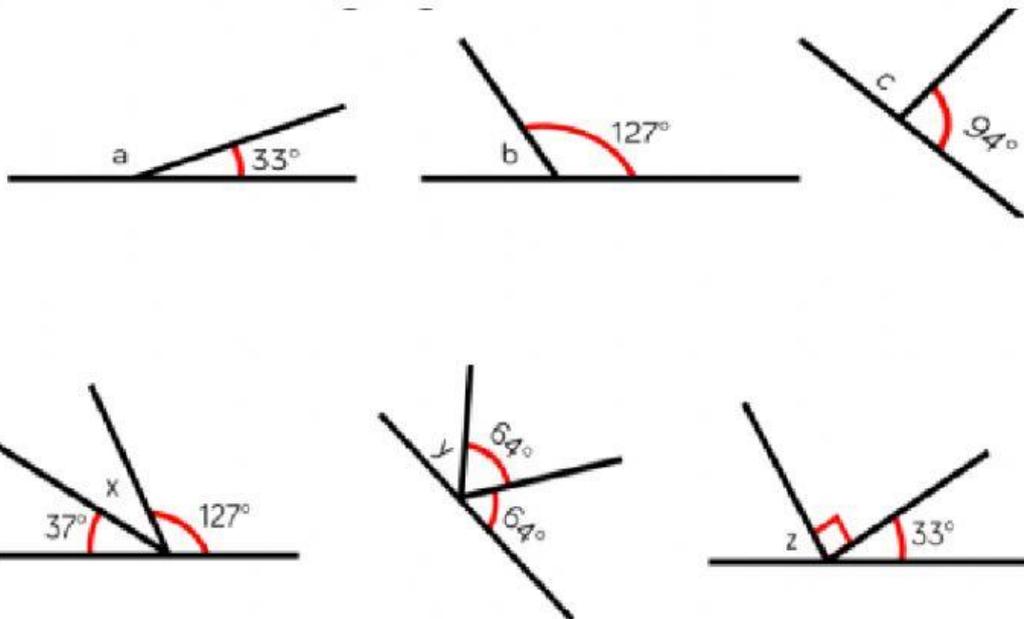

There are _____ degrees in a right angle.

There are _____ right angles on a straight line.

There are _____ degrees on a straight line.

**Task 2:** Watch video: https://www.youtube.com/watch?v=cBIJmmz8flI

**Task 3:** Calculate the angles below. * Remember that angles on a straight line **always** add up to 180 degrees.

**Reasoning:**

Jack is measuring two angles on a straight line.

My angles measure 73° and 108°

Explain why at least one of Jack's angles must be wrong.
