# GADGET?

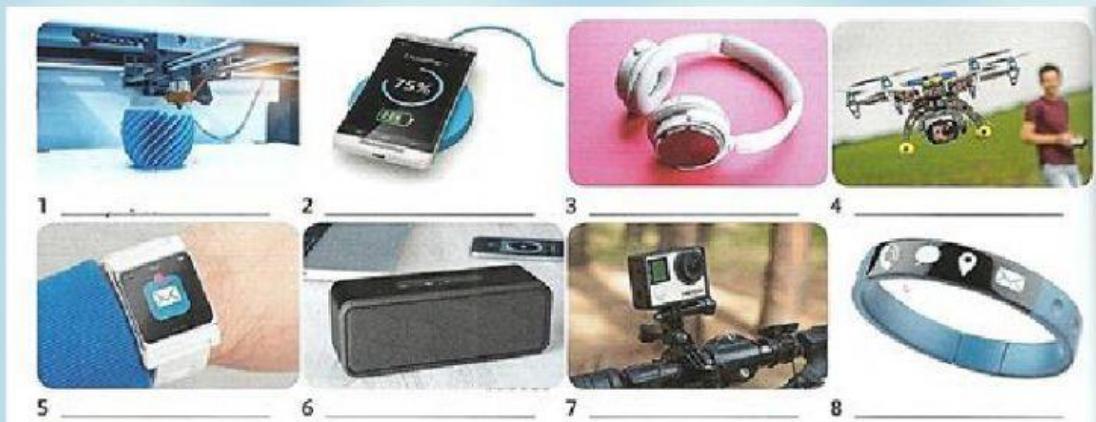

What's "gadget" in your language? .....

## 1-DRAG & DROP

Label the pictures.

- 3 D printer
- Action camera
- Drone
- Smart bracelet
- Smart watch
- Wireless charger
- Wireless headset
- Wireless speaker

## 2-Complete the text with the correct gadget

Smartphones have been around for years, but the wireless gadgets that go with them are changing all the time. The <sup>1</sup> \_\_\_\_\_, for example, tells the time and shows you messages and other information from your phone. A <sup>2</sup> \_\_\_\_\_ allows you to listen to music from your phone in privacy, while a <sup>3</sup> \_\_\_\_\_ can play the music loudly, and with excellent sound quality. A <sup>4</sup> \_\_\_\_\_ can power your phone with electricity without the need for long cables. And a <sup>5</sup> \_\_\_\_\_ can send information about your heart rate and how far you've walked. With gadgets like these developing so fast, the future of wireless technology looks exciting!
