

## 5.2 Pewarisan/ Inheritance

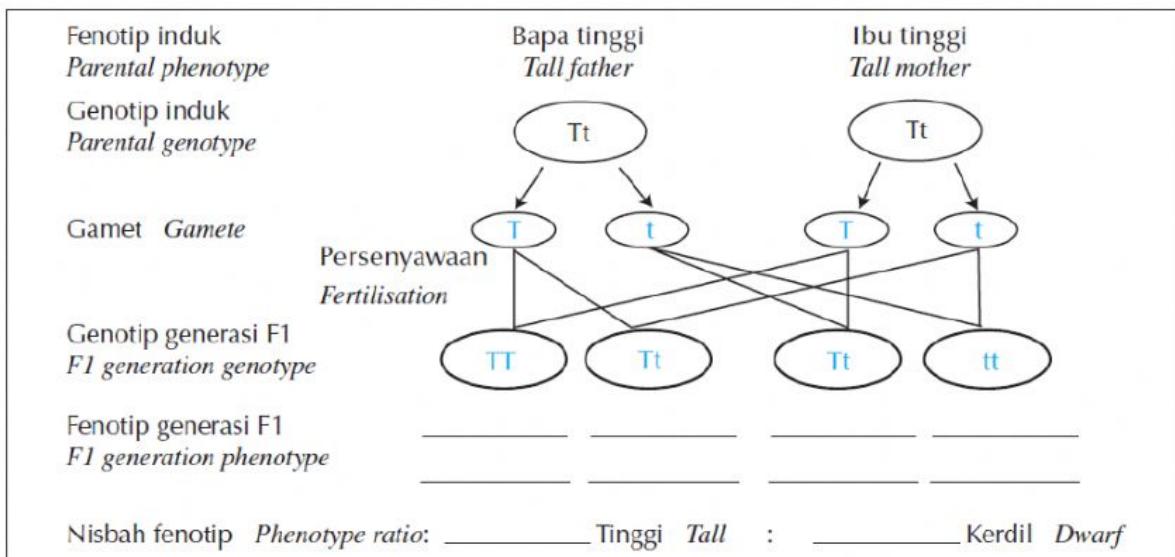

- 8 Lengkapkan pernyataan-pernyataan di bawah dengan perkataan yang diberi di mana ada yang boleh digunakan lebih daripada sekali.

Complete the sentences below using the words given which can be used more than once. [SP 5.2.1] [TP 1]

<b>fenotip</b> <i>phenotype</i>	<b>genotip</b> <i>genotype</i>	<b>Gregor Mendel</b> <i>Gregor Mendel</i>	<b>ciri-ciri fizikal</b> <i>physical properties</i>
------------------------------------	-----------------------------------	--	--

- (a) Ahli saintis Austria \_\_\_\_\_ (1822 -1884) dikenali sebagai bapa bidang genetik.  
\_\_\_\_\_ (1822 -1884) an Austrian scientist was known as father of genetics.
- (b) \_\_\_\_\_ merujuk kepada maklumat genetik suatu organisma yang terdapat dalam gen.  
\_\_\_\_\_ refers to the genetic information found in the genes of an organism.
- (c) \_\_\_\_\_ pula merujuk kepada \_\_\_\_\_ yang boleh dilihat pada suatu organisma.  
\_\_\_\_\_ refers to the \_\_\_\_\_ which can be seen in an organism.

- 9 Lengkapkan rajah skematik berikut yang menunjukkan pewarisan ketinggian.  
Andaikan 'T' mewakili gen dominan (tinggi) dan 't' mewakili gen resesif (kerdil).  
Complete the following schematic diagram that illustrates the inheritance of height.  
Assume that 'T' represents the dominant gene (tall) and 't' represents recessive gene (dwarf). [SP 5.2.2] [TP 3]

- 10 Lengkapkan maklumat mengenai perbandingan gamet seks manusia.

*Complete the information below regarding the comparison between human sex gametes.* [SP 5.2.2] [TP 1]

(a) Lelaki Male	Ciri-ciri Characteristics	(b) Perempuan Female
	Kandungan kromosom <i>Chromosome content</i>	
Sperma <i>Sperm</i>	Nama gamet <i>Name of gamete</i>	
	Kandungan kromosom dalam gamet <i>Chromosome contents in gamete</i>	22 + X

- 11 Lengkapkan rajah skema penentuan jantina pada manusia.

*Complete the schematic diagram of sex determination in human beings.* [SP 5.2.2] [TP 3]
