

## PRÁCTICA CALIFICADA: FRACCIONES

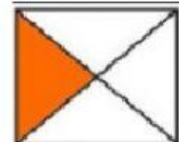

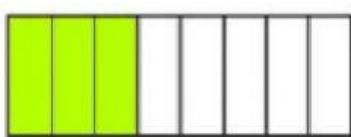

Escoge la fracción que representa la parte sombreada.

- |               |               |               |               |
|---------------|---------------|---------------|---------------|
| $\frac{1}{2}$ | $\frac{3}{6}$ | $\frac{5}{6}$ | $\frac{1}{6}$ |
|---------------|---------------|---------------|---------------|

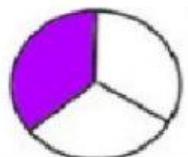

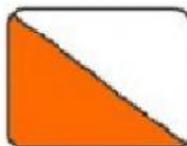

- |               |               |               |               |
|---------------|---------------|---------------|---------------|
| $\frac{1}{4}$ | $\frac{3}{4}$ | $\frac{1}{6}$ | $\frac{1}{3}$ |
|---------------|---------------|---------------|---------------|

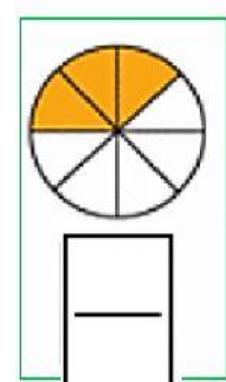

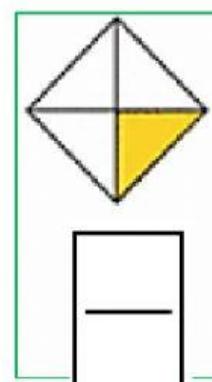

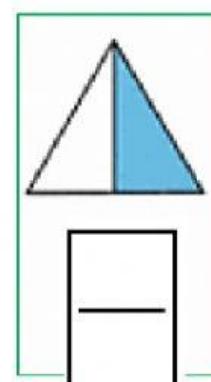

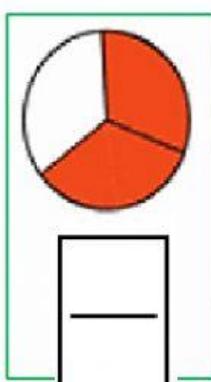

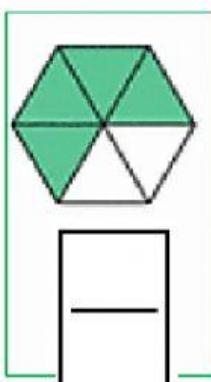

- |               |               |               |               |
|---------------|---------------|---------------|---------------|
| $\frac{1}{2}$ | $\frac{1}{6}$ | $\frac{3}{8}$ | $\frac{6}{8}$ |
|---------------|---------------|---------------|---------------|

- |               |               |               |               |
|---------------|---------------|---------------|---------------|
| $\frac{1}{2}$ | $\frac{1}{5}$ | $\frac{3}{6}$ | $\frac{1}{4}$ |
|---------------|---------------|---------------|---------------|

De acuerdo al gráfico mostrado, escribe cómo se leen las siguientes fracciones.

Escribe la fracción que representa la siguiente imagen.

Resuelve la siguiente suma y resta de fracciones homogéneas:

$$\frac{125}{5} + \frac{45}{5} = \underline{\quad}$$

$$\frac{243}{16} + \frac{125}{16} = \underline{\quad}$$

$$\frac{326}{17} - \frac{127}{17} = \underline{\quad}$$

$$\frac{428}{9} - \frac{335}{9} = \underline{\quad}$$

Realiza la siguiente multiplicación de fracciones:

$$\frac{6}{4} \times \frac{5}{3} = \underline{\quad}$$

$$\frac{5}{5} \times \frac{8}{9} = \underline{\quad}$$
