

Power tools – Activity 12

NAME:

A. Read the definition and match with its word.

1. To cut through the wood, use a device with a rotating metal disk that has sharp teeth.
2. Joe’s tool that breaks up hard surfaces is broken.
3. Start laying concrete after the rotating barrel mixes everything.
4. Get the electrically powered tool with a rotating bit.
5. Before you paint the wood, use a machine that makes wood smooth on it.
6. If the wall is too hard to hammer the nail into it, try the device that drives nails into a surface when you pull a trigger.

- A. Cement mixer.
- B. sander
- C. Jackhammer
- D. nail gun
- E. Circular saw
- F. Power drill

B. Read the sentence and choose the correct word

- A. The **reciprocating saw** / **circular saw** cuts through materials by going back and forth.
- B. To make a hole in the stone, use a **nail gun** / **hammer drill**.
- C. Use the **cement mixer** / **compactor** to flatten the ground.
- D. Since there is no electricity in here, hook up the jackhammer to the **air compressor** / **sander**.

C. Listen to a conversation between two construction workers.

Complete it with the following words.

battery - concrete – yes – extra – cordless - wood – expensive – steel -

Worker 1: Kyle, is that one of those Bentley power drills?

Worker 2: Yes. It’s the Power Drill 3000?

Worker 1: Aren’t they

Worker 2:, but it’s worth the money. It drills into everything.

....., everything.

Worker 1: Wow ! It’s, right? Does the last long?

Worker 2: Unfortunately, no. But it’s not a big deal.

Worker 1: How so?

Worker 2: It came with batteries. So if it run out, I just put in another.

D. Listen AGAIN (de nuevo) and put X in the correct options.

- A. Costs little money.
- B. Long-lasting battery.
- C. Drills through concrete.
- D. Drills though steel.
- E. Has extra batteries
