

Land and Water

Earth has different kinds of land.

Some land is flat.
A **plain** is flat land.

Some land is very high. A
mountain is very high land.

Some land is higher than
a plain but not as high
as a mountain. This land
is called a **hill**.

1. What is the highest
kind of land?

2. What is the flattest land?

3. Which is higher, a hill
or a plain?
