

NEW COMET

Comet NEOWISE Shooting Across the Sky

People will be able to see a new comet in July. This comet is called NEOWISE. A comet looks like a bright light in the sky. It has a long, bright tail. It can be as bright as the Moon! Comets are made of ice and dust. People will be able to see Comet NEOWISE in the early morning or the evening. They should be able to see Comet NEOWISE without using binoculars or telescopes. People can take pictures of the comet too. NASA wants people to send pictures of Comet NEOWISE to them. Will you look for Comet NEOWISE?
