

SECUENCIAS DE NÚMEROS

Three number sequence puzzles are presented, each featuring a cartoon worm character at the end of the sequence.

Sequence 1: A sequence of 8 ovals. The first oval contains the number 6000. An arrow points from the first oval to the second oval with the label $+2$. The fifth oval contains the number 6008. The eighth oval is a cartoon worm with a smiling face.

Sequence 2: A sequence of 8 ovals. The second oval contains the number 8035. The fourth oval contains the number 8031. An arrow points from the second oval to the third oval with the label -2 . The first oval is a cartoon worm with a smiling face.

Sequence 3: A sequence of 8 ovals. The first oval contains the number 7063. The fifth oval contains the number 7075. An arrow points from the first oval to the second oval with the label $+3$. The eighth oval is a cartoon worm with a smiling face.

Escribe al lado de cada moneda cuántas hacen falta para pagar la cantidad indicada:

a. 6,17

b. 8,53

c. 4,44

d. 7,08

¿Cuál es el valor de cada figura?

$$4 + \text{circle} = \text{triangle}$$

$$\text{triangle} - 5 = \text{square}$$

$$6 - \text{square} = \text{heart}$$

$$\text{heart} + 2 = 2$$

$$7+8$$

15 12 13

$$6+8$$

18 14 13

$$4+8$$

10 12 15

$$9+5$$

12 14 17

$$8+5$$

12 14 13

$$1-8$$

9 3 7

$$8-6$$

4 2 7

$$7-5$$

2 6 4

$$7-2$$

5 6 2

$$3-7$$

6 4 2
