Quantifiers: much, many, a lot of

We use 'many' with countable nouns.

Example: There are many supermarkets in the city. There aren't many movie theaters in the city.

We use 'much' with uncountable nouns.

Examples: Is there much cake left?

We use 'a lot of' with plural countable nouns.

Example: The zoo has a lot of animals.

We use 'a lot of' with uncountable nouns.

Example: There is a lot of employment and industry in the city.

Note:

We use "too much" and "too many" to say that the quantity of something, or the number of people or things, is larger than reasonable or necessary.

Example: This city has too many taxis. Too much violence and corruption make cities dangerous.

Tokyo Subway

What can you say about the subway in your city? If you don't have one, how would you like it to be?

Read the article and answer the questions. Use a dictionary to find the meanings of the words you don't know.

Explain them to your classmates and give examples using them. Now close your book and describe the Tokyo subway.

The Tokyo subway system is rapid and punctual. An average of 17 million people use the Tokyo subway every year. There is a subway sign and the name of the subway station at the entrance to each station in Japanese and in English. People use ticket vending machines to purchase their tickets. The subway in Tokyo opens at 5 a.m. and closes at 1 a.m. the next morning. Some subway lines have "women-only" cars during rush hour. The Tokyo subway is clean and safe.

- How many people use the Tokyo subway every year?

- What do people use to purchase their tickets?

- What time does the subway in Tokyo open?
