

EVALUACIÓN DE ECUACIONES

AREA: MATEMÁTICAS

RESUELVE LAS SIGUIENTES ECUACIONES

❖ $10X + 2 = 4X + 50$

$$\square - \square = \square - \square$$

$$\square = \square$$

$$\square = \frac{\square}{\square}$$

$$\square = \square$$

❖ $12X + 10 = 4X + 50$

$$\square - \square = \square - \square$$

$$\square = \square$$

$$\square = \frac{\square}{\square}$$

$$\square = \square$$

$$\diamond 8X + 9 = 4X + 45$$

$$\square - \square = \square - \square$$

$$\square = \square$$

$$\square = \frac{\square}{\square}$$

$$\square = \square$$

$$\diamond 15X + 6 = 6X + 69$$

$$\square - \square = \square - \square$$

$$\square = \square$$

$$\square = \frac{\square}{\square}$$

$$\square = \square$$
