Why do well-off people shoplift?

By Kathryn Westcott

BBC News Magazine

10 January 2012

Many can't explain their actions

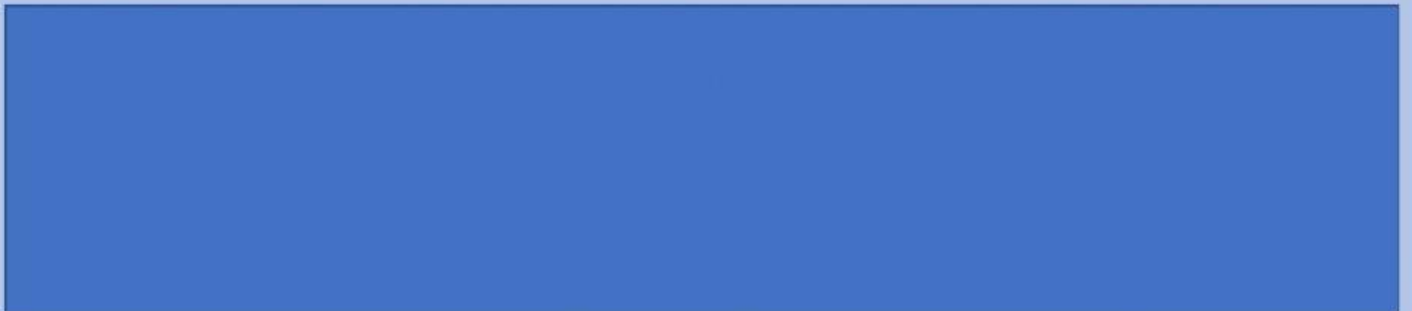

Chef Antony Worrall Thompson has apologised for shoplifting from a supermarket. But what makes people steal things when they have enough money to pay?

Worrall Thompson has apologised for his "stupid and irresponsible actions", after being cautioned by police for leaving a branch of Tesco without paying for small value items. He had reportedly done this on five separate occasions.

The 60-year-old has spoken of the shame of letting his family and friends down. The big question, he says, is "why".

Experts agree that in these cases, shoplifting is rarely about genuinely needing the item that is stolen. It is often about seizing the opportunity to momentarily exercise control when the perception is one of powerlessness.

What do you think about it?
