KIDS' WEB 5 – UNIT 4

1 <u>Listen</u> and check *Do* for the things you have to do and *Don't* for the things you can't do.

		Do	Don't
1	open the door		
2	turn off the computer		
3	turn off the lights		
4	open the windows		
5	take the subway		
6	tell your cousin about the party		

2 Read and check.

PLANT A TREE FOR THE PLANET

HOW TO PLANT A TREE

1 Before you dig, find out what is underground.
2 Choose the best kind of tree for the area and the right place to put it.
3 Dig a planting hole.
4 Put the tree into the hole and make sure it is straight.
5 Fill the hole.
6 Don't forget to take good care of it! Make sure it gets enough water and sunlight.

WHY PLANT TREES?

- They help reduce air temperature because they block sunlight.
- They give many animals a place to live and something to eat.
- They absorb CO_2 and release oxygen, so they make the air cleaner.
- They absorb sound and reduce noise pollution.

1 What kind of text is it?

   A (   ) An e-mail.

   B (   ) A leaflet.

2 What is its objective?

   A (   ) To inform.

   B (   ) To practice Science.

3 Who can read it?

   A (   ) Any person interested in the topic.

   B (   ) Only scientists.

3 Read the text in activity 2 again and circle.

1 The text presents **instructions** / **ingredients** on how to plant a tree and explains how trees **cause problems to** / **help protect** the environment.

2 When you plant a tree, it is important to **put** / **dig** a hole and then **fill** / **put** the tree into it.

3 Trees need **temperature** / **water** and **animals** / **sunlight**.

4 **Take** / **Don't take** care of the trees you plant.

5 Different animals can **live** / **block** in a tree.

6 They help reduce the **temperature** / **animals** and **pollution** / **light** in the air.
