Area and Perimeter

Monday

DO

The area of a square is 81 square centimeters.

- a) Find the length of one of its sides.

$$81 = \underline{\hspace{1cm}} \bigcirc \underline{\hspace{1cm}}$$

Length of one side = $\underline{\hspace{1cm}}$ cm

- b) Find the perimeter of the square.

$$\begin{aligned} \text{Perimeter} &= \underline{\hspace{1cm}} \bigcirc \underline{\hspace{1cm}} \\ &= \underline{\hspace{1cm}} \text{ cm} \end{aligned}$$
