Area and Perimeter

Wednesday

Read and Understand.

Finding area of composite figures
by adding areas of rectangles

Let's Learn

Find the area of the figure.

Picture
It

The figure is made up of
two rectangles.

Read and Understand.

Method 1

1.4
3+

Area of figure = Area of Rectangle A + Area of Rectangle B

$$\begin{aligned}\text{Area of Rectangle A} &= 12 \times 15 \\ &= 180 \text{ m}^2\end{aligned}$$

$$\begin{aligned}\text{Area of Rectangle B} &= 16 \times 5 \\ &= 80 \text{ m}^2\end{aligned}$$

$$\begin{aligned}\text{Area of figure} &= 180 + 80 \\ &= 260 \text{ m}^2\end{aligned}$$

Read and Understand.

Method 2

Picture It

The figure can be divided in another way.

1 2 3 4 Area of figure = Area of Rectangle C + Area of Rectangle D

$$\begin{aligned} \text{Area of Rectangle C} &= 12 \times \square \\ &= \square \text{ m}^2 \end{aligned}$$

$$\begin{aligned} \text{Area of Rectangle D} &= \square \times 5 \\ &= \square \text{ m}^2 \end{aligned}$$

$$\begin{aligned} \text{Area of figure} &= \square + \square \\ &= \square \text{ m}^2 \end{aligned}$$

Compare Methods 1 and 2.
Which method is easier? ☐

$$\begin{aligned} \text{Breadth of Rectangle C} &= 15 - \square \\ &= \square \text{ m} \\ \text{Length of Rectangle D} &= \square + \square \\ &= \square \text{ m} \end{aligned}$$

Do

The figure is made up of two rectangles.
Find its area.

Area of the figure
= Area of rectangle A
+ Area of rectangle B

cm²

Work it out on paper and type only the answer in the blocks.

Find the area of each figure.
All sides meet at right angles.
