

DOMINGO SAVIO BILINGUAL SCHOOL
SCIENCE REVIEW WORKSHOP – II TERM

This groups of animals have hard bodies, live under the sea and one example of the group is the starfish. What group of animals is it?

In the following picture you can see different examples of animals.
The cool-blooded animals of the picture are:

- a. Echinoderms and mammals
- b. Amphibians and reptiles
- c. Arthropods and birds

The sun is a star of the solar system with 9785600000000000 kg compared to the Earth that only weights 5972000000 kg. This is an example of the following property of the matter:

- a. Mass
- b. Density
- c. State
- d. Volume

Match the following animals with the correct group:

AMPHIBIANS

ARTHROPODS

MAMMALS

Watch the following picture. The order (from less to more) of density is:

- a. Water, yellow, red, water
- b. Blue, water, red, yellow, water
- c. Red, yellow, blue, water

What of the following pictures is a heterogeneous mixture?

Fruit salad

Coffee, sugar, milk

Medicine

Petroleum
