Computer Safety

The Internet now connects people in ways that are completely new: You can tell all your friends about your activities with one click. You can buy things that aren't in shops. You can play games with people on the other side of the world.

All of these things are convenient and fun but you need to be careful too. When you use the Internet, only visit sites your parents and teachers trust. Some websites can take your information and sell it to other people. This is especially dangerous if you show your home address, your school name or your location. You also need to be careful when you make new friends on the Internet. Never plan to visit a person you meet online. People can use false names and information to hurt you or other people. Finally, be kind to others. Don't use the Internet to embarrass or make fun of other people. It's not cool and it isn't funny. The Internet is great when you use it well. Be connected and have fun!

play games with people on the other side of the world	visit people you meet online	buy things online
put your home address, school name or location	tell your friends about your activities	make fun of other people on the Internet

Good things you can do online	Things you mustn't do
