

## Exercise 1.1

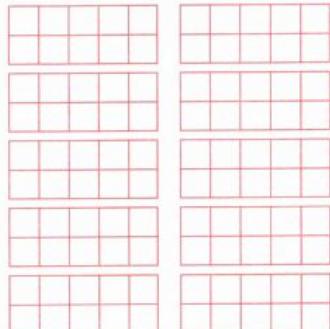

1. Look at the squares and answer.

A. 

How many ones are there?  
\_\_\_\_\_ one or  $1 \times 1 = 1$

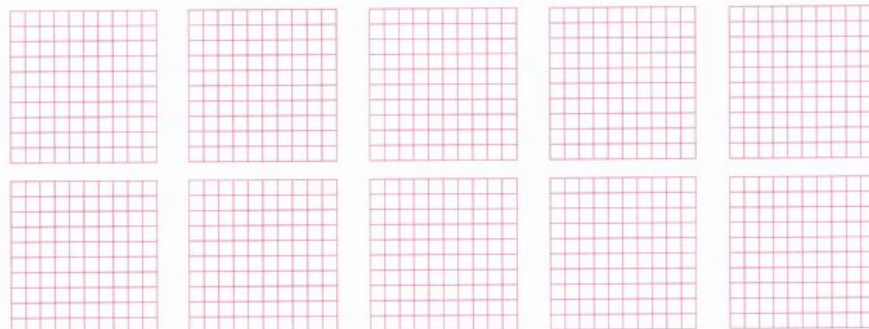

B. 

How many ones are there?  
\_\_\_\_\_ ones = \_\_\_\_\_ ten or  $1 \times 10 =$  \_\_\_\_\_

C. 

a. How many tens are there?  
 $10 \times 1$  ten = \_\_\_\_\_ tens

b. How many ones are there?  
 $10 \times 10$  ones = \_\_\_\_\_ ones  
= 1 hundred

D. 

a. How many hundreds are there?  
 $10 \times 1$  hundred = \_\_\_\_\_ hundreds

b. How many tens are there?  
 $10 \times 10$  tens = \_\_\_\_\_ tens  
= 1 thousand or  $10 \times 100 = 1000$

c. How many ones are there?  
 $10 \times 100$  ones = \_\_\_\_\_ ones = 1 thousand or  $1 \times 1000 = 1000$

How many zeros are there in one thousand?

Let me see.  
There are three zeros in 1,000!
