

$\operatorname{arccsch}(z) = \ln \left( (1 + \sqrt{1 + z^2}) / z \right)$   
 $(a \cdot b)^n = a^n \cdot b^n \sim \forall x [p(x)] = \exists x [\sim p(x)]$   
 $\tanh(z) = -i \tan(iz)$   
NAME \_\_\_\_\_

### ACTIVITY 3.

As you listen to the song, decide which is the best option out of the underlined words.

#### Mike

You know the laws/paws of physics  
And life is quite the same  
You need to move, don't sit and wait  
You have to change your game/name.

Albert, trust the force/horse in you  
Nothing happens if you're still  
If you don't push/bush yourself  
Nothing ever will.

#### Mike (CHORUS)

Trust me, it will work!  
That, I can guarantee/parakeet  
In case we fail  
That's just plan A  
There's always time for B.

Trust me, it will work!

That, I can guarantee

In case/place we fail

That's just plan A

There's always time for B.

#### Albert

Are you sure? 'Cause I'm not  
What if I look like a fool?

Mike:

I know you won't, show me your moves/movies  
I bet they're really cool/fool.

#### Mike

OK, we'll work on that!

PART 2

**Mike**

You know the laws of physics  
And life is quite/right the same  
You need to move, don't sit and wait/play  
You have to change your game.

**Albert**

Are you sure? I don't know/no  
Maybe if you've got my back/black...

**Mike**

You'll get moving/morning and momentum  
Will keep you on the right track.

**Mike (CHORUS)**

Trust me, it will work!  
And that is just plan B.  
If you don't try,  
you'll never/ever know  
There's always time for C.

Trust me, it will work!  
And that is just plan B.  
If you don't try,  
you'll never know  
There's always time for C.

PART 3

**Albert**

Now, WE know/now the laws of physics  
And we both made a new friend  
Our force is more together/forever  
It will push us till the end.

**Mike**

You're right! Whatever/Whoever happens,  
I'm your friend! I've got your back!

**Albert**

I know that's true. Right back at you!  
I'm here no matter/mate what.

**BOTH**

Trust me, it will work  
I'll be here/there by your side  
It can't go wrong  
It won't as long as  
we know that we have tried.

Trust me, it will work  
I'll be here by your side/guide  
It can't go wrong  
It won't as long as  
we know that we have tried/fried. Yeah!
