

TIDES AND WAVES

1. Drag and drop the labels on the chart

2. Complete the text to explain what's going on in the chart.

Pay attention to SPELLING AND TENSES. If you complete the correct word, but the spelling is incorrect, you will not get the points!

In the picture on the _____, the Sun and the Moon's gravitational _____ together provokes _____ tides on the Earth's ocean water. On the side that has no celestial bodies pulling, the tide is _____.

In the picture on the _____, the Sun's _____ pull is not as strong as the _____'s gravitational pull, so the Earth ocean _____ on the side of the Sun is on low _____, and the water on the side of the Moon, is on _____.
