

Suma y resta de fracciones

$$1) \frac{1}{2} - \frac{8}{3} = \frac{\underline{\quad} * \underline{\quad} - \underline{\quad} * \underline{\quad}}{\underline{\quad}} = \frac{\underline{\quad} - \underline{\quad}}{\underline{\quad}} = \frac{\underline{\quad}}{\underline{\quad}} = \underline{\quad} \frac{\underline{\quad}}{\underline{\quad}}$$

$$2) \frac{2}{5} + \frac{7}{3} = \frac{\underline{\quad} * \underline{\quad} + \underline{\quad} * \underline{\quad}}{\underline{\quad}} = \frac{\underline{\quad} + \underline{\quad}}{\underline{\quad}} = \frac{\underline{\quad}}{\underline{\quad}} = \underline{\quad} \frac{\underline{\quad}}{\underline{\quad}}$$

$$3) \frac{3}{10} + \frac{1}{20} = \frac{\underline{\quad} * \underline{\quad} + \underline{\quad} * \underline{\quad}}{\underline{\quad}} = \frac{\underline{\quad} + \underline{\quad}}{\underline{\quad}} = \frac{\underline{\quad}}{\underline{\quad}} = \underline{\quad} \frac{\underline{\quad}}{\underline{\quad}}$$
