- B) Some accuse the company of the programming language from its competitor

Many phrasal verbs can become nouns. For example, you can "start up" a company (phrasal verb) or work in a "start-up" (phrasal noun) – a small company.

When a phrasal verb becomes a phrasal noun, sometimes the verb comes first, like "start-up"; and sometimes the preposition comes first, such as "outbreak".

To show that it's a noun, you can either put a hyphen between the noun and the preposition ("start-up") or write it as one word ("startup").

Why study with ?
