Module 1 7.RP.1   Name
Do Now   College
Date_____

In a closet, there are 10 shirts and 15 shorts.
Use a model to find the simplest ratio of shirts to shorts.
Now, give the simplest ratio of shirts to shorts.
Type your answer in the format 1:2

If you have 8 shirts, how many shorts would you need to have to keep the same ratio?

Raven has 4 shirts and 5 shorts in her closest. Is the ratio of shirts to shorts in Raven's closet the same as the ratio above?

Yes

No

Advanced: Use the same model that you drew in part (a) to find the percent of the items in the closet that are shirts.

Use the Percent sign (%) in your answer...example 100%
