Write the expression in exponential form:

$$(5 * 5 * 5 * 5) =$$

17 times

Use the ^ symbol to represent an exponent.

Example:  $5^2$  should be typed as 5^2 no spaces.

Write the expression in exponential form.

$$(-4)(-4)(-4)(-4) =$$

Use the ^ symbol to represent an exponent.

Example:  $5^2$  should be typed as 5^2 no spaces.

$$x * x * x * x * y * y$$

Use the ^ symbol to represent an exponent.

Example:  $5^2$  should be typed as 5^2 no spaces.

Write the expression in Exponential form

$$3 * a * a * a * a * a * b$$

Use the ^ symbol to represent an exponent.

Example:  $5^2$  should be typed as 5^2 no spaces.
