Module 1 7.RP.1   Name
Do Now   9/10   College
Date_____

In your pocket, you have 8 quarters and 6 dimes.
Use a mode to find the simplest ratio of quarters to dimes.
Type your answer in the format 1:2

If you have 30 dimes in your pocket, how many quarters would you need in order to keep the same ratio as above?

Write the fraction that will represent the number of dimes in your pocket.
Use / to write your fraction: example 1/2

Which are ways to write a ratio? Choose all that apply.

2 to 5

2:5

$\frac{2}{5}$
