Worksheet :58

Date :10-09 -2020

Class : VI-VIII Name of the Student _____ Name of the C.T _____

Along with maintaining our personal hygiene, it is important that we keep our surroundings clean. So we must clean our homes daily ,we should not allow waste to be accumulated inside our homes .We should try to put wet wastes (peels of fruits and vegetables) in **Green dustbin** and dry wastes (plastic, metal objects, broken pieces of glass) in **Blue dustbin** so that it is easier to manage waste. Glass bottles or clothe bags can be checked thoroughly before throwing into the dustbins , Can it be reused? If yes, then we must try to use them again.

Let's see, what we have learnt:

1. Your brother has torn paper into small bits .In which dustbin should he put the paper bits?
2. Write the names of two things that should be checked before throwing into the dustbin and these things can also be reused?
3. Make a list of Dry Wastes in your home!
4. Draw the dustbins in which your mother should throw the wastes of vegetables and fruits .
