Adding Integers with Different Signs

Pirections: Model each problem with counters and write the sum.

1.) -7 + 2 =

 $2.) 4 + -3 = ____$

 $3.) -9 + 2 = ____$

 $4.) 4 + -8 = ____$

5.) -3 + 6 =

6.) -5 + 3 =

7.) -1 + 9 =____

Do you see a pattern? What do you notice?

Write a rule for adding integers with different signs?
