

## October 1 Math Problem of the Day

### Today is National Homemade Cookies Day!

1. Count the sugar cookies.

9

10

8

2. Each of my homemade chocolate chip cookies has 5 chocolate chips in it. How many chocolate chips would I need in order to make 5 cookies?

20

25

30

3. One batch of my chocolate chip cookie dough yields 24 cookies. How many batches would I have to make to get 72 cookies?

( C is the variable in the equation below)

$$24 \times C = 72$$

( or  $72 \div 24$ )
