

Name: _____

Division with Repeated Subtraction

Repeated subtraction is a strategy for solving division problems.

Example: $8 \div 2 = \text{-----}$

$$8 - 2 = 6$$

$$6 - 2 = 4$$

$$4 - 2 = 2$$

$$2 - 2 = 0$$

2 was subtracted 4 times. So $8 \div 2 = 4$

Use repeated subtraction as seen in the example above to solve the following division problems.

1

$$15 \div 3 = \text{-----}$$

2

$$6 \div 2 = \text{-----}$$

3

$$10 \div 2 = \text{-----}$$

4

$$12 \div 3 = \text{-----}$$

5

$$16 \div 4 = \text{-----}$$

6

$$20 \div 5 = \text{-----}$$

7

$$18 \div 6 = \text{-----}$$

8

$$14 \div 2 = \text{-----}$$
