

Label the process of photosynthesis.

carbon dioxide

energy and light from the Sun

water and minerals

Circle the correct answers about plant nutrition.

- a. How do plants get their energy? They make their own food / They eat other plants
- b. What do we call this process? Fertilisation / Photosynthesis / Pollination
- c. What do plants absorb from the air? Oxygen / Carbon dioxide / Minerals
- d. What else do plants need for this process? Sunlight / Darkness / Moisture
- e. What do plants release into the air? Oxygen / Carbon dioxide / Water

expulsor

Complete the equation for photosynthesis.

water + minerals + + sunlight = food +
