

Multiplying 2-digit numbers by 10

Use the place value grids to work out these multiplication questions by moving each number one place to the left and adding 0 as a place holder in the ones column.

1) $34 \times 10 = \underline{\quad}$

H	T	O
	3	4

2) $67 \times 10 = \underline{\quad}$

H	T	O

3) $15 \times 10 = \underline{\quad}$

H	T	O

4) $38 \times 10 = \underline{\quad}$

H	T	O

5) $96 \times 10 = \underline{\quad}$

H	T	O

6) $41 \times 10 = \underline{\quad}$

H	T	O

Challenge!

Now try to calculate some of your own 2-digit numbers by 10 without using a place value grid!
