

**For each problem, write a multiplication equation and solve. Use scratch paper to show your work.**

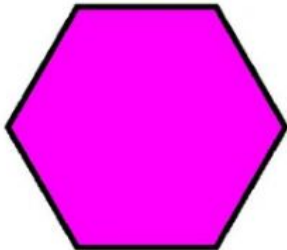

1. Triangles have 3 sides. How many sides do 7 triangles have?

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

**7 triangles would have        sides.**

2. Hexagons have 6 sides. How many sides do 7 hexagons have?

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

**7 hexagons would have        sides.**
