The solutions of a quadratic equation are 1 and -3. Which of the following equations have these solutions?

$4x^2 + 8x - 12 = 0$

$-0.1x^2 + 0.4x + 90 = 0$

$2x^2 + 4x - 6 = 0$

$-2x^2 + 2x = 0$

$-x^2 + x = 0$

$x^2 + 6x + 9 = 0$
