

Scientist	Atomic theory
1. J.J Thomson	1. Rearranged to pattern of the periodic table to atomic number
2. John Dalton	2. Electrons travel in certain paths or energy levels.
3. Democritus	3. There are small, negatively charged particles inside an atom.
4. Ernest Rutherford	4. He wanted to know why elements combine in specific proportions
5. Niels Bohr	5. Most of an atom's mass in the nucleus.
6. Henry Moseley	6. Atoms cannot be separated into two bodies.
