- B. How about going to the beach?
- C. How about studying together with me?
- D. How about calling the police?

B. Read the text carefully, then answer the questions based on the instruction given!

Tsunami is a Japanese word from a seismic sea wave generated by an undersea earthquake, landslide, or eruption. Most tsunamis happen along the ring of fire. It is a zone of volcanoes and seismic activity. The zone encircles the Pacific Ocean.

Historically, tsunamis have caused much destruction and death. Since 1819, about 40 tsunamis have struck the Hawaiian Islands and since 1883, about 20 tsunamis have struck Indonesia. The last one was on December 26, 2004, which caused over 100,000 deaths.

A tsunami can have a width of 100 to 200 km and may spread far across the deep ocean. The speed is as fast as a jet plane. When the wave reaches land it can be very high, about 15 m or more.

No	Statement	True/False
1.	Tsunamis can only happen in Japan	True/False
2.	Tsunamis are caused by undersea earthquake or	True/False

	landslides	
3.	The ring of fire is the area of volcanoes and seismic activities	True/False
4.	The speed of the wave can be as fast as a jet plane	True/False
5.	Tsunamis are not very high	True/False

C. Read the procedure text below, then match the statements!

HOW TO MAKE FRIED RICE?

Step

1. 2 cloves of Garlic
2. 2 onions cut into small pieces
3. 1 table spoon of vegetable oil
4. a plate of rice
5. some salt

Goal

1. First, pound garlic and 2 pinches of salt.
2. Second, heat vegetable oil on a frying pan.
3. Third, put the pounded garlic and salt, and onions into the hot vegetable oil. Fry them a while.
4. Fourth, put one plate of rice. Fry and mix them around 3 menit.
5. Fifth, add two pinches of salt. Continue frying until the rice is hot enough.
6. Finally, put the fried rice on a plate. Serve with a sunny-side up.
