Extreme Weather

Cut and glue the normal weather conditions into the extreme weather categories. Then talk about weather.

Tornado	Blizzard
 <p>hot stormy windy</p>	<div style="display: flex; justify-content: space-around;"><div style="border: 1px solid black; width: 80px; height: 80px;"></div><div style="border: 1px solid black; width: 80px; height: 80px;"></div><div style="border: 1px solid black; width: 80px; height: 80px;"></div></div>
Hurricane	Flood
<div style="display: flex; justify-content: space-around;"><div style="border: 1px solid black; width: 80px; height: 80px;"></div><div style="border: 1px solid black; width: 80px; height: 80px;"></div></div>	very, very <div style="border: 1px solid black; width: 80px; height: 80px; display: inline-block; vertical-align: middle;"></div>

cold

windy

windy

rainy

rainy

snowy

In a tornado, it's hot, stormy, and windy.
