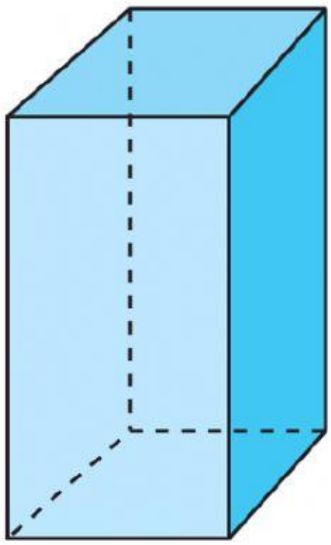
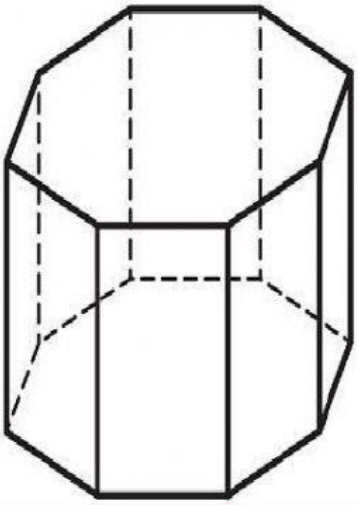
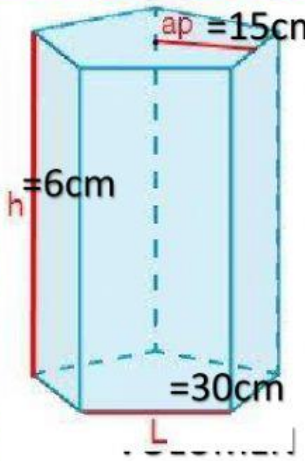
Prismas y Pirámides

Identifique el siguiente Prisma:





Calcula el ÁREA total y volumen del siguiente Prisma y distingue qué tipo de Prisma es.



ÁREA DE BASE

$$Á = \frac{P * ap}{2}$$

$$Áb = \frac{\quad * \quad}{2}$$

$$Áb = \frac{\quad}{2}$$

$$Áb = \quad cm^2$$

$$Áb = \quad * 2b$$

$$Áb = \quad cm^2$$

ÁREA LATERAL

$$Ál = P * h$$

$$Ál = \quad *$$

$$Ál = \quad cm^2$$

ÁREA TOTAL

$$Át = Ál + 2 * Áb$$

$$Át = \quad +2 *$$

$$Át = \quad +$$

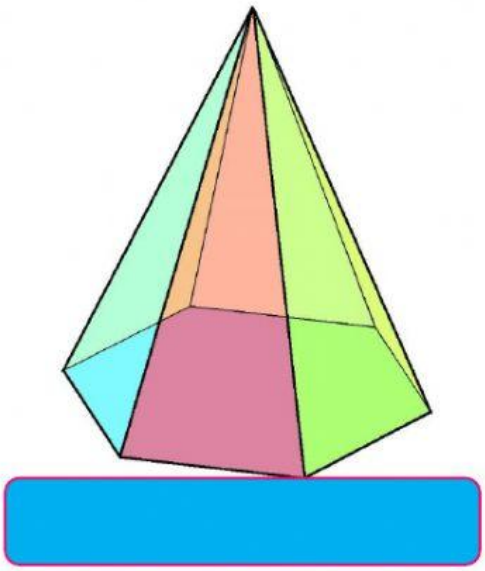
$$Át = \quad cm^2$$

$$V = Áb * h$$

$$V = \quad *$$

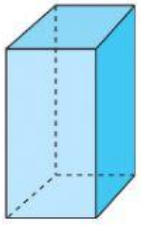
$$V = \quad cm^2$$

Distingue qué tipo de pirámide es:

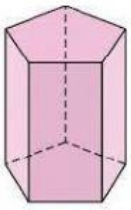


Relacione según corresponda el poliedro:

Prisma Pentagonal



Pirámide Hexagonal



Prisma Cuadrángular
