

Mathematics

Obj: I can calculate the Area of irregular shapes by counting squares.

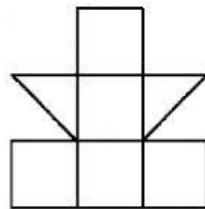

Each square () is 1 square unit. Each half-square () is $\frac{1}{2}$ square unit.
Find the area of each figure.

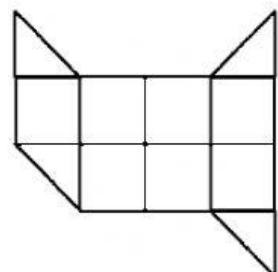

$$\text{Area} = \text{units}^2$$

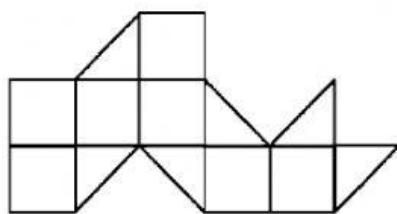

$$\text{Area} = \text{units}^2$$

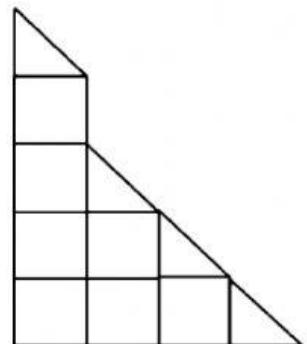

$$\text{Area} = \text{units}^2$$

$$\text{Area} = \text{units}^2$$

$$\text{Area} = \text{units}^2$$

$$\text{Area} = \text{units}^2$$
