Brushing Teeth____7

Watering grass____9

Dishwasher_____11

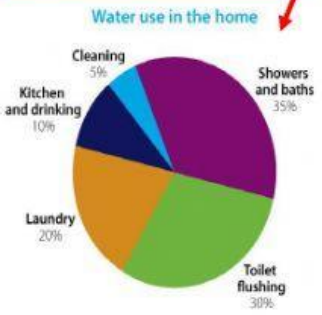

Domestic water use in Canada.

Did you know?

Home water use makes up a bout 5% of total water use worldwide.

Water Cycles

Every plant and animal on Earth needs water. People use water the most. The more people there are, the more water is used. Water moves through the **environment**. This means water never goes away. We can not get the same amount of water in one place every year. The amount of water on Earth does not change, but in some places there is not enough water, and in others, there is too much. Also, in some places, you might not be able to drink the water because it is polluted.

Environment: where a person or animal lives

Harm: to do something bad to someone

Pollute: to put bad things into the water or air

conserve	2,3
environment	6
leak	4
waste	4,8
