

# SENSE OF HEARING

1° Drag the names to the correct place:

EAR

NERVE

EARDRUM

INNER  
EAR

MIDDLE  
EAR

OUTER  
EAR

2° Fill in the gaps:

Our senses allow us to \_\_\_\_\_ with the world around us. Our \_\_\_\_\_ of \_\_\_\_\_ allows us to distinguish between different \_\_\_\_\_.

3º Order the steps of the sound the dog is listening till the brain:

© M. G. M. 2009

1

They continue to the **middle ear** and make the **eardrum** vibrate.

2

This movement sends information to the **brain**.

3

Sound waves enter the **outer ear**.

4

These vibrations make the liquid in the **inner ear** move.
