

APLICAR LA FÓRMULA DE HERON EN LOS SIGUIENTES TRIÁNGULOS

1.- Complete:

Calcular área y perímetro usando la fórmula de Heron en los siguientes triángulos

$$P = a + b + c$$

$$P = \underline{\hspace{2cm}} \text{ cm}$$

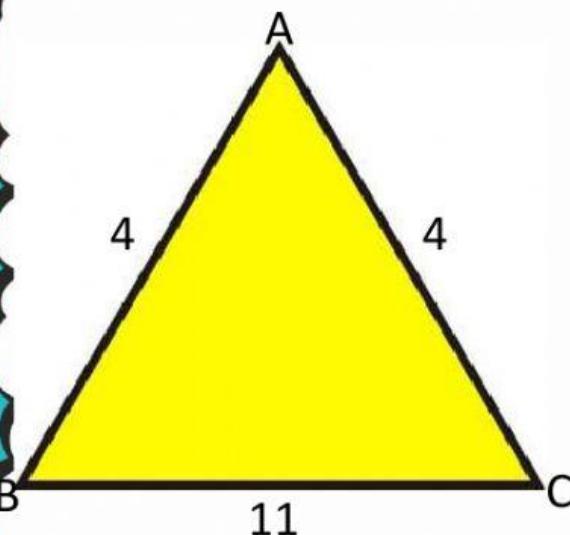

$$A = \sqrt{\underline{\hspace{2cm}}(\underline{\hspace{2cm}} - a)(\underline{\hspace{2cm}} - b)(\underline{\hspace{2cm}} - c)}$$

$$A = \sqrt{\underline{\hspace{2cm}}(\underline{\hspace{2cm}} - \underline{\hspace{2cm}})(\underline{\hspace{2cm}} - \underline{\hspace{2cm}})(\underline{\hspace{2cm}} - \underline{\hspace{2cm}})}$$

$$A = \sqrt{\underline{\hspace{2cm}} \cdot \underline{\hspace{2cm}} \cdot \underline{\hspace{2cm}} \cdot \underline{\hspace{2cm}}}$$

$$A = \sqrt{\underline{\hspace{2cm}}}$$

$$A = \underline{\hspace{2cm}} \text{ cm}^2$$

$$P = a + b + c$$

$$P = \underline{\hspace{2cm}} \text{ cm}$$

$$A = \sqrt{\underline{\hspace{2cm}}(\underline{\hspace{2cm}} - a)(\underline{\hspace{2cm}} - b)(\underline{\hspace{2cm}} - c)}$$

$$A = \sqrt{\underline{\hspace{2cm}}(\underline{\hspace{2cm}} - \underline{\hspace{2cm}})(\underline{\hspace{2cm}} - \underline{\hspace{2cm}})(\underline{\hspace{2cm}} - \underline{\hspace{2cm}})}$$

$$A = \sqrt{\underline{\hspace{2cm}} \cdot \underline{\hspace{2cm}} \cdot \underline{\hspace{2cm}} \cdot \underline{\hspace{2cm}}}$$

$$A = \sqrt{\underline{\hspace{2cm}}}$$

$$A = \underline{\hspace{2cm}} \text{ cm}^2$$

Calcular el área de base, área lateral y área TOTAL y volumen

1.- Lee y razona escribe el nombre y apellido
de los siguientes prismas y triángulos.
